# CONSULTING AND PROFESSIONAL SERVICES

At Pinnacle, we help connect your people to information, experts and each other.

With today's complex IT environments, it is critical to have the correct resources and project team assigned to a given task to avoid cost overruns and missed deadlines. Within Pinnacle's Consulting & Professional Services team, we have the experienced consultants you need available to support all areas within IT. They understand today's business challenges and how to solve them. Whether you are looking for experienced project managers, industry-specific knowledge or a very specialized technical skill, Pinnacle has the network of highly capable professionals to ensure success on your next important project.

Pinnacle's Depth & Breadth

Pinnacle is simply not your traditional solution provider. We represent many of the industry's leading manufacturers along with having disciplines in Professional Services, Application Development, Managed Services and Hosting Services.

We Work With You, AND For You

Pinnacle specializes in technology centered solutions for today's marketplace. Our services work directly with our client's technology choices so that our solutions can be tailored to each client's unique needs. Pinnacle Business Systems can provide comprehensive IT solutions that incorporate servers, storage, software, printers, professional services and financing. With the direct involvement of our Professional Services team, we can facilitate assessments, design, configuration and implementation services.

ABOUT PINNACLE

Pinnacle offers proven consulting and professional services that is backed by 25 years of experience delivering end-to-end technology solutions that drive value to the business and return on your investment. Our engineers and project managers are local, accessible and collectively hold over 100 certifications in various disciplines, products and services. Plus, Pinnacle has partnerships with multiple vendors — ensuring a custom solution that is comprised of the technologies you need to meet the growing demands of your business. We are constantly researching and evaluating market trends so we are ahead of the pack, ensuring we have flexible choices for our customers. In addition to our consulting and professional services, we offer custom solutions for our customers in the following areas:

- Compute
- Storage
- Data Protection
- Virtualization
- Assurance
- Networking
- Managed Services
- GRC/Security
- Unified Communications

For more than 25 years, Pinnacle has been designing and implementing flexible, scalable solutions around industry-leading platforms and technologies. With offices across the United States, we have the local depth and breadth of technical skills to ensure success on your next strategic project.

A Professional Services Team that is Second to None

An important criteria in selecting a consulting company is the depth and breadth of their personnel. At Pinnacle, we strive to provide our customers with the best level of expertise available. While we maintain a broad range of skills, our consultants are very specialized in their field of expertise, averaging more than 10 years of experience.

By focusing our people on specific business objectives, we are able to provide experts for your important initiatives. Our portfolio of over one hundred certifications is in industry-recognized competencies across a wide range of manufacturers and disciplines. Pinnacle has the complete portfolio of offerings - from the initial technology assessment through to the design and implementation of the solution.

Technical Skills When and Where You Need Them

While Pinnacle maintains an extensive team of consultants on staff, sometimes there exists a need for a very specialized, one-off skill. Pinnacle can deliver in this space through its vast network of proven subcontractors. By keeping our own in-house team very lean, we are able to keep our hourly rates extremely competitive. When additional people are needed, Pinnacle is able to draw from proven talent around the country, and deliver the skill set as an extension of our own team.

Typically when our customers search for this specialized talent on their own, they are never quite sure what to expect. Pinnacle puts their reputation behind every resource we place, and has developed a delivery model that is efficient and very cost effective. The goal is for Pinnacle to be that primary point of contact our customers turn to when they need qualified talent for strategic projects, regardless of the specialty.
